Leave Mounds of Paperwork Behind and Save Time with a Robust Online Enrollment/Management Solution

▶ Employers spend more than $50 billion per year on paper processes in the administration of group insurance products, and benefits enrollment procedures make up a fair share of that total. Reduce your administrative burden with benefitsCONNECT,® a web-based employee benefits enrollment and management system that streamlines enrollment processes, enhances benefits management and improves information-sharing among employees, employers and insurance providers. Once plans and options are entered, benefitsCONNECT can program and schedule automatic data exports to your group insurance carriers and payroll company — saving you time and reducing the cost of benefits enrollment.

UBA® United Benefit Advisors
PARTNER FIRM

Shared Wisdom. Powerful Results.®

Why benefitsCONNECT?

Improves the Enrollment Process:
benefitsCONNECT streamlines the enrollment process by:

✔ Enabling efficient data-sharing and transferring of information to any third party who can accept electronic files

✔ Producing enrollment forms populated with information entered online by the employees for vendors who require forms

✔ Producing online employee benefit statements

✔ Allowing documents, such as SPDs or benefit overviews, to be uploaded for employees to access any time

✔ Including a modeling component to calculate benefit costs during the enrollment process

Boosts Management Capabilities:
benefitsCONNECT can increase efficiency in benefits management by:

✔ Leveraging the use of information collected for management reporting purposes (Data can be downloaded into Microsoft Excel or ACCESS to further customize reports)

✔ Integrating benefit election data with existing internal systems, such as payroll, HRIS and other corporate accounting and management systems

✔ Producing vendor billing information

✔ Maintaining a chronological transaction log — vital to the integrity and accountability of any benefits administration system
